DECLARATION OF AI USE

Artificial Intelligence Disclosure Statement — BorNEO HackWknd

COMPETITION INFORMATION

Project Name : Fluent
Track : Non - Technical

TEAM INFORMATION

Team Name : blukutuk77
Team Institution : Institut Teknologi Bandung
Team Members : - Rafel Dzinun Muhammad
- Muhammad Orkhan
- Bagas Anugrah Putra
- Muhammad Zaky Amani
- Shaquille Nathan Kalevi

DECLARATION

We, blukutuk77 declare that we have / ~~have not~~* used any form of artificial intelligence (AI) tools in the preparation, development, or completion of the above-mentioned submission. If AI was used, the full scope, tools, and level of use are disclosed below.

SCOPE OF AI USE

SCOPE OF WORK	TOOL NAME & VERSION *	LEVEL OF USE **	PURPOSE / NOTES
Research & Information Retrieval	Perplexity	Mid	To collect initial data for our research in order to make our project relevant for the market needs
Code Generation & Debugging	Claude Sonnet 4.6	High	Because there is something we still don't know about
Prototyping & UI/UX Design Assistance	Figma Make	Low	To get the rough idea, but then we've develop it further on our self
Ideation & Brainstorming	Gemini Pro	Low	Make some basic ideas to be develop more
AI Model Integration	Groq API (LLaMa 3.3.-70B)	High	Core AI chatbot engine, financial advisor response, and streaming output

COMPLIANCE CLAUSES

By submitting this declaration, all team members confirm the following:

- All AI-generated content in this submission has been reviewed, verified for accuracy, and substantially refined by our team. We take full collective responsibility for the integrity of the final work.
- No confidential, personal, or sensitive data belonging to third parties, clients, or institutions was submitted to any AI tool during the preparation of this project.
- We acknowledge that AI-generated content may carry intellectual property or copyright implications, and we accept full responsibility for compliance with applicable laws and competition policies.
- We declare that all AI use in this submission has been fully and accurately disclosed in this statement. No undisclosed AI tools were used.

Custom Engineering by Team

The following components were independently built by the team without AI generation:

- Financial Resilience Score Algorithm
- Digital Twin 90-day cash flow projection model
- Behavioral Nudge Rule Engine
- Full Backend Architecture Design
- React Native Frontend
- Multilingual system

Scalability & Future Roadmap

Business Model Canvas

BMC Component	Detail
Key Partners	Gig platforms (Grab, Gojek, Shopee), HR departments at corporates, ASEAN financial regulators, banking institutions for data integration
Key Activities	AI model fine-tuning, financial data processing, multilingual content development, user behavior analysis, partnership development
Key Resources	LLaMA 3.3-70B via Groq API, PostgreSQL database, React Native codebase, financial algorithm IP, multilingual dataset
Value Propositions	Prescriptive financial guidance (not retrospective), ASEAN-native design, zero-cost access, real-time AI advisor, 90-day cash flow forecasting
Customer Relationships	AI-driven personalization, behavioral nudge system, in-app financial education, community financial challenges
Channels	Mobile app (iOS & Android), gig platform integrations, employer wellness programs, finfluencer partnerships, social media
Customer Segments	Young professionals (22-35), active BNPL users (18-30), gig economy workers across ASEAN
Cost Structure	AI API costs (Groq), cloud infrastructure (Railway/Render), engineering team, marketing, compliance and regulatory costs
Revenue Streams	Freemium (free core, premium AI advisor), B2B employer wellness packages, financial institution data partnerships, in-app certified financial planner (CFP) consultation fees

Scalability Roadmap

Phase	Timeline	Key Milestones
Phase 1 — MVP Launch	0-6 months	Deploy on Railway, onboard first 1,000 users in Indonesia, validate Resilience Score accuracy, integrate real bank transaction data via OJK open finance API
Phase 2 — Monetization	6-18 months	Introduce Fluent Elite subscription. Partner with HR platforms and employers to offer Fluent as an employee financial wellness benefit.
Phase 3 — Expand	18-36 months	Expand to Philippines, Vietnam, Thailand. Pursue Series A. Launch B2B API licensing for banks wanting to embed the Resilience Score into their own apps.
Phase 4 — Platform	36+ months	Open API for third-party financial products, ASEAN financial health data insights for regulators and institutions, expand to all other ASEAN member states

ASEAN Relevance Explanation

Fluent is not a product adapted for ASEAN, its built from the ground up for the region's specific financial behaviors, digital ecosystem, and demographic realities. Every design decision, from multilingual support to BNPL-specific risk metrics, reflects the unique challenges of Southeast Asia's 670 million people.

Problem	ASEAN Data	Source
Low Financial Literacy	Only 30% of SEA adults are financially literate, one of the lowest rates globally	S&P Global Finlit Survey
Invisible Spending	Digital payments reduce psychological pain of paying, triggering overspending behavior	NIH/PMC Neuroscience Study, 2022
BNPL Misuse	20%+ BNPL adoption across every major ASEAN market; most users cannot explain loan terms	UnaFinancial / The Digital Banker, 2024
No Long-Term Planning	54% of Asians have no financial plan beyond 12 months; only 8% plan beyond 10 years	Sun Life Asia Financial Resilience Index, 2025
Gen Z Fragility	56% of Gen Z live paycheck to paycheck; 86.6% of online borrowers in Indonesia are Gen Z/Millennial	Deloitte 2025 / Indonesian Internet Providers Association
Regret	55% of retirees across Indonesia, Malaysia, Philippines, Singapore, Vietnam regret not saving enough	Sun Life Retirement Reimagined Survey, 2024

ASEAN Specific Design Decision:

- Multilingual Support : English, Bahasa Indonesia, Bahasa Melayu, Tagalog, Thai, Vietnamese, Burmese, Khmer, Lao.
- BNPL Aware Metrics : Using Resilience Score to specifically tracks users BNPL debt exposure and debt to income ratio. Metrics tailored to ASEAN's unique landscape
- Gig Economy Focus : designed for workers with fluctuating monthly income. A dominant employment model across ASEAN.
- Zero cost Access : Free-tier infrastructure ensures the product is accessible to all ASEAN users regardless of income level

Market Opportunities

Metric	Value	Source
ASEAN Digital Economy (2030 projection)	USD 1 trillion	Google/Temasek/Bain e-Conomy SEA Report, 2025
ASEAN BNPL Market (2027 projection)	USD 53.2 billion	UnaFinancial / The Digital Banker, 2024
ASEAN Population	670 million people	ASEAN Secretariat, 2024
ASEAN Adults with no financial plan beyond 12 months	54%	Sun Life Asia Financial Resilience Index, 2025
Direct Competitors combining all Fluent features	0	Competitive landscape analysis

SDG Alignment

SDG	Goal	How Fluent Contributes	Fluent Feature
SDG 1	No Poverty	Fluent helps users avoid debt traps and financial collapse by providing early warnings before their financial situation becomes critical. The Resilience Score identifies users at risk before a single unexpected event destroys their finances.	Financial Resilience Score, Behavioral Nudges
SDG 4	Quality Education	The AI Financial Advisor and in-app lesson system provide personalized, on-demand financial education in multilanguage, making quality financial learning accessible to anyone with a smartphone, not just those who can afford formal education.	AI Financial Advisor, Lesson System, Multilingual (EN / OFC ASEAN)
SDG 8	Decent Work & Economic Growth	Fluent directly supports gig workers and professionals in managing unstable income, building savings runway, and planning for long-term economic participation, contributing to individual economic growth and regional financial stability.	Digital Twin
SDG 10	Reduced Inequalities	Quality financial advisory has historically been available only to the wealthy. Fluent give access to the same level of financial literacy for all 670 million ASEAN users at zero cost, reducing the financial planning inequality gap.	Zero-cost access, all core features free for all users
